ASTR 101 – Introduction to Astronomy

Credits: 4

Astronomy 101 will be a lecture course with a laboratory component that satisfies the requirements of the Carolina Core and it is designed to replace the self-paced Astronomy 111. The goal of the course is to excite and inform the non-scientist about the vast nature of the universe in which we live.

Astronomy 101 will cover a wide range of topics in Astronomy at a level available to students without any scientific background. The laboratory requirement will be the completion of eight exercises offered on a bi-weekly schedule throughout the semester.

This course will be offered each semester beginning with Summer Session 2 – 2014.
